2008

As a result of the International Conference, a collective work (*Violences faites aux femmes*) has been published in the *Problèmes sociaux et Interventions sociales*' collection of the Presses de l'Université du Québec (PUQ), under the direction of Suzanne Arcand, Dominique Damant, Sylvie Gravel et Elizabeth Harper.

The book contains 23 chapters, written in French and in English by 44 authors, which come from a dozen countries around the world. There are numerous subjects addressed in this work, such as various forms of physical violence against women in different countries, illegal trafficking of women, prevention of conjugal homicide, rape in wartime, filicides fathers, the culture of firearms in rural communities and its impact on abused women, domestic violence, etc.

We know the urgent need to develop a network of international experts in the field of violence against women.

With this book, we wish to promote the exchanges among experts and practitioners to ensure that this network is built, because we are convinced that the mobilization of communities all around the world is at the heart of the solutions for the future.
